Projects

Personal Portfolio Website

- Built a personalised website with React.js to showcase my projects, skills, level of education, and experience.
- Utilised Tailwind CSS in order to rapidly style a visually appealing website with well-organised code structure.
- Optimized website for mobile and desktop viewing, ensuring seamless user experience across all devices.
- Implemented a navigation bar and smooth-scrolling functionality for simple navigation across website sections.

School Cafeteria Management System

- Collaborated in a team environment to develop the back-end infrastructure for a Java-based catalog system.
- Engineered a student-facing interface for browsing menu items, viewing prices, and submitting item requests.
- Developed an administrative dashboard providing staff with functionality to view, update, and manage inventory.
- Applied object-oriented programming principles to create maintainable and easily scalable code.

Responsive Gym Website

- Developed a dynamic website using HTML, CSS, and JavaScript optimized performance across various devices.
- Implemented modern design principles and strategic layouts to ensure a seamless and user-friendly experience.
- Designed interactive features including membership registration as well as contact and feedback forms.
- Implemented immediate form validation and navigation menu for improved user interaction efficiency.

Experience

K-12 Math Tutor, A-Star Learning Inc. – Calgary, Canada

September 2025 - Present

- Identified gaps in students' knowledge and weaknesses through careful diagnostic assessments.
- Implemented various targeted strategies tailored to each student in order to improve comprehension.
- Explained mathematical concepts using real-world applications to enhance understanding and engagement.
- Collaborated with company staff and attended regular meetings to align tutoring strategies with organizational goals.

Receptionist, ADC Ultrasound and X-Ray – Calgary, Canada

September 2022 – February 2023

- Quickly and efficiently learnt to use Velox Software Suite to store, retrieve, and update patient medical records.
